

Limitations and Contraindications of HCT

WBMT Riyadh

January 2017

Patient Selection

- Dynamic concept
- Heterogeneity
 - Patient-related factors (modifiable and non-modifiable factors) [what is the TRM risk with HCT]
 - Disease-related factors (disease type [is HCT the only curative approach?] and disease stage [optimal timing])
 - Healthcare system-related factors
 - Local factors (economic [willingness to pay threshold]....prevalence of certain co-morbidities...)
- Comparative analysis and cost-effective analysis
